

JUNE 2018

# COUNTRYSIDE VET SERVICE

**"ADVANCED MEDICINE WITH A COMPASSIONATE TOUCH"**

## Jr. Vet Day Participants

For those of you that signed up for Jr. Vet Day this is a reminder to be at Countryside Vet Service June 23rd at 8:30 AM. Dress weather appropriate as the event is held outdoors. We can not wait to see everyone!!

## Pet Appreciation Week

In honor of pet appreciation week here at countryside/ Nokomis vet service, we will be having a photo contest. During pet appreciation week, June 4th-8th, on our Facebook page we will have a pet appreciation post. Comment a picture of your pet for a chance to win a special prize! The pet with the most likes for the week will win. Make sure to share for more likes.

## Boarding!

As the warm weather sets in, everyone is wanting to go on vacation. Come let your pet come stay with us while you're gone! We offer individual playtime with your pet too! Call today to reserve your spots before it's too late!

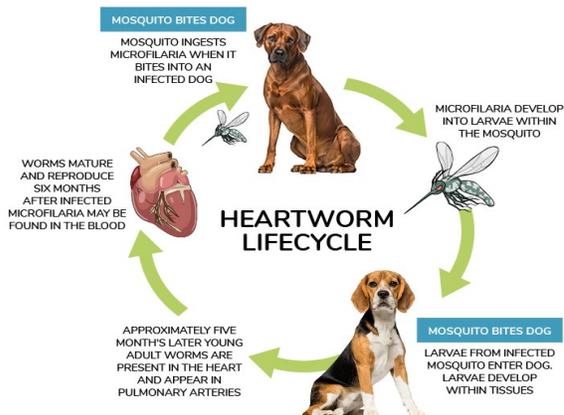

## HEARTWORM DISEASE

Mosquitos are out and are thick! Here at Countryside we have already seen 5 heartworm cases in the last month! Most of the cases found were not showing symptoms and were found on yearly heartworm screening tests, which is why we like to test yearly! We were lucky and caught them before symptoms started which made treatment much easier on the dogs! The cost of heartworm treatment is the same price as buying 6 years worth of prevention!

Why would you not have your dogs on heartworm prevention?

## #1 Health Issue?

The most common health issue in pets is **OBESITY!** All creatures process food differently. Just like humans, some can eat anything while others look at cake and gain 20 pounds! In the average dog, feeding 3oz of bacon strip treats which is around 3 slices is equivalent to humans eating 4 donuts! Treats should be limited to no more than 10% of the daily intake. There is no excuse for being fat! Please help your pet live a longer healthier live!

# HAPPY SUMMER!!
